

## **THE METALLIC MIRRORS OF THE MAGIC TELESCOPE**

Bastieri D.; Bigongiari C.; Mariotti M.; Pepato A.; Peruzzo L.; Saggion A.; Sartori P.; for MAGIC Collaboration.

The reflecting surface of the MAGIC experiment is a 17m. f1 parabola made by 936 mirrors. Each mirror is a 495x495mm\*\*2 square with spherical shape. The recent developments in the construction of metallic mirrors and their optical properties will be described.
