

SEARCH FOR MAGNETIC MONOPOLES AT CHACALTAYA

S. Cecchini for the SLIM Collaboration (1)

(1)Istituto TeSRE/CNR, v. P. Gobetti 101, 40129 Bologna, Italy

The new large area (400 m²) experiment - SLIM - to search for Magnetic Monopoles and other exotic massive particles is presented. It uses Nuclear Track Detectors and is installed at the Chacaltaya Cosmic Ray laboratory. The detection capability of the experiment are discussed.
